## Questions to Ask Your Doctor

Are there other treatment options for my condition?

Will this lead to cancer?

Should surgery be considered to fix my condition?

What other medications might be useful to relieve my symptoms?

Should I have endoscopic examinations more frequently?

What can I do to relieve my symptoms?

Should I be on a special diet?

Are the medications I am taking for my other medical conditions making my condition worse?

Are there other tests I should have to evaluate my condition?

Will I need to take medication the rest of my life?
